

Thermometer 480

Description

Features

- Temperature range infrared: -33 °C to 220 °C
- Control unit: Knob
- Temperature range: -55 °C to 330 °C
- Design: Digital
- With temperature sensor: Yes
- Designed for: Core temperature measurements
Surface temperature measurements (infrared)
- Properties: Automatic shutdown
Memory function (memory highest or lowest temperature)
Temperature range also in Fahrenheit
- Colour: White
- Temperature measurement units: °C
°F
- Application area: Steaming
Cooling
- Puncture depth: 110 mm
- Material temperature sensor: Stainless steel
