Water Softener 8 liters – compact and professional solution

Say goodbye to limescale and protect your equipment with this professional 8-liter water softener. Thanks to the high-quality resin column, calcium and magnesium ions are effectively removed, keeping coffee machines, combi steamers, dishwashers, and ice machines performing optimally for longer. The housing is made of durable stainless steel AISI 304, ideal for intensive use in bars, kitchens, and restaurants. With a compact diameter of 185 mm, height of 400 mm, and easy 3/8"-3/4" connection, the softener reliably delivers soft water at a water pressure of 1–8 bar. Salt consumption per regeneration: 1 kg.

Key features:

- Durable stainless steel AISI 304 housing for intensive professional use
- Compact 8-liter design fits easily in small spaces
- Easy installation with 3/8"-3/4" connection
- Reliable operation at water pressure of 1–8 bar
- Effectively removes limescale and prolongs equipment lifespan

Ensure optimal protection for your equipment and extend its lifespan. Order this water softener today and experience the difference immediately!
