

AF10

SLIMLINE STAINLESS STEEL AUTOFILL WATER BOILER

Description

Ensure you have instant hot water on demand 24/7 with the AF10 from Blizzard. With its ridged stainless steel construction and robust heavy duty tap, the AF10 is ready for use whenever needed with its integrated 10L capacity and auto fill feature which allows for direct plumbing into your water supply via a 3/4" BSP water inlet hose.

With the adjustable digital temperature control, electronic timer for switching the unit on/off and included drip tray you'll struggle to find fault with this auto fill boiler.

Features

- Stainless steel construction
- Comes with 3/4 BSP water inlet hose
- Height of tap facilitates the filling of tall teapots
- Suggested to be installed in conjunction with a water softener
- Adjustable digital temperature controller
- Electronic timer enables programming to automatically switch on and off during one time period
- Robust heavy duty tap designed for constant use
- Keeps at boiling point of 100°C
- Productivity 35 Litre per hour
