The Dupla is an innovative solution, designed to create maximum storage and display area in a small footprint. Instead of having two freezers back to back, the Dupla is built as a single "back to back" island site freezer. By removing the dividing wall that would normally be between the 2 units a significant amount of space is created. Using an advanced refrigeration system, the cabinet uses significantly less energy rather than two traditional back to back systems. Save space, increase display area and reduce running costs.
